## PROJECTS

- ❖ Argonaut **|** Cruise | Java 11, Spring, Sprout, Microservice, Apache Camel, Kafka.  *(Jul 2022 - Present)*
  *Description*
  - The Royal Caribbean Group (RCG), comprising brands Royal Caribbean, Silversea, and Celebrity, is a prestigious client of iTravel Cruise. iTravel Cruise will enable RCG to evolve from selling a cruise cabin to becoming a "total vacation provider" that can deliver personalized guest services at every step of the trip. The product offers improved services that contribute to the entire vacation experience, such as booking flights, hotels, and transfers, as well as providing guests with personalized offers, credits, and loyalty rewards throughout the trip using an integrated guest wallet.

  *Roles & Responsibilities*
  - Responsible for conducting requirement analysis and designing solutions, actively participating implementation processes, preparing unit test cases, reviewing code and configurations. Additionally, accountable for accommodating changes based on client requirements and adeptly utilizing framework implementations in the development of products.

- ❖ SA Airlink **|** Airline | Java , Spring Boot, Rest Api, Hibernate, SQL, React.  *(Aug 2021 – Jun 2022)*
  *Description*
  - Airlink, headquartered in Johannesburg, South Africa, primarily focuses on connecting smaller, underserved towns with major hub airports. Over time, it has expanded its services to include flights on larger, mainline routes, resulting in an extensive network of over 60 routes spanning 50+ destinations

  *Roles & Responsibilities*
  - Responsible for conducting requirement analysis and designing solutions, actively participating in deployment and implementation processes, preparing unit test cases, reviewing code and configurations. Additionally, accountable for accommodating changes based on client requirements and adeptly utilizing framework implementations in the development of products.
